Digital Marketing – Practical File

Practical 1. Write steps to create Local Listing on Google My Business with Fig.

What is Local Listing?

A Local Listing is an online profile of a business (name, address, phone number, category, hours, etc.) created on directories, search engines and map services like Google, so that nearby customers can easily find, contact and visit the business.

List of Local Listing Sites:

- Google My Business (Google Business Profile)
- Bing Places for Business
- Facebook Business Page
- Justdial
- Sulekha
- IndiaMART
- Yelp

Importance of Local Listing Sites:

- Helps customers find the business easily in 'near me' / location-based searches.
- Improves visibility on Google Search and Google Maps.
- Builds trust through verified information, ratings and reviews.
- Improves local SEO ranking through consistent business data across platforms.
- Increases footfall, calls and online enquiries for the business.

Features of Local Listing Sites:

- Display of NAP (Name, Address, Phone Number) and business hours.
- Map/location pin integration.
- Customer review and rating system.
- Photo and video upload option.
- Business posts/offers/updates section.
- Insights/analytics on views, clicks and calls.

Steps to Create a Local Listing on Google My Business:

- **Step 1:** Go to google.com/business and click on 'Manage now'.
- **Step 2:** Sign in using a Google account (create one if not already available).
- **Step 3:** Enter the business name in the search box provided.
- **Step 4:** Select the correct business category (e.g. Restaurant, Coaching Centre, Retail Shop).
- **Step 5:** Choose whether the business has a physical location customers can visit and add the complete address.
- **Step 6:** Add the service area (if applicable) for businesses that deliver to customers.
- **Step 7:** Enter the business contact number and website URL (if available).
- **Step 8:** Click 'Finish' and choose a verification method — postcard by mail, phone call, email, or instant verification (if eligible).
- **Step 9:** Complete the verification process by entering the code received.

- **Step 10:** Once verified, log in to the Google Business Profile dashboard and complete the profile — add business hours, description, photos, and services/products.
- **Step 11:** Publish the profile so it becomes visible on Google Search and Google Maps.
- **Step 12:** Regularly update posts, respond to reviews, and check Insights for performance.

Practical 2. Create a Landing Page for Upcoming Workshop with Registration Form Using Google Sites / Canva / AI Platforms. (Workshop: AI Tools, Date: 21 Aug 2026, Expert: Prof. Ravi Patel)

What is a Landing Page?

A Landing Page is a standalone web page created for a specific marketing goal — in this case, workshop registration — where visitors land after clicking a link, and are asked to take one single action: filling the registration form.

List of Landing Page Development Platforms:

- Google Sites
- Canva (Websites feature)
- WordPress (Elementor/Divi)
- Wix
- Unbounce
- HubSpot
- Leadpages / Instapage

Features of a Landing Page:

- Single, clear headline and objective (Workshop Registration).
- No navigation menu, keeping focus only on the offer.
- Details of the event — topic, date, speaker, time and venue/link.
- One clear Call to Action (CTA) button, e.g. 'Register Now'.
- Embedded registration form to capture visitor details.
- Mobile-responsive design and fast loading speed.

Importance of Landing Page:

- Increases registration conversion rate by removing distractions.
- Makes it easy to track how many people registered from a specific campaign/ad.
- Creates a professional, credible impression of the workshop.
- Can be directly linked from social media ads, emails, or WhatsApp messages.

Steps to Create the Landing Page (using Google Sites):

- **Step 1:** Go to sites.google.com and click on 'Blank' to start a new site.
- **Step 2:** Name the site — e.g. 'AI Tools Workshop Registration'.
- **Step 3:** Add a banner/header with the title: 'AI Tools Workshop – 21 Aug 2026'.
- **Step 4:** Add a text box with workshop details: Topic – AI Tools, Date – 21 Aug 2026, Expert – Prof. Ravi Patel, along with 2–3 lines on what participants will learn.

- **Step 5:** Insert an image/banner related to AI/technology to make the page visually appealing.
- **Step 6:** Create a Google Form separately with fields: Name, Email, Phone Number, Organisation/College, and 'Why do you want to attend?'.
- **Step 7:** Embed the Google Form into the Google Sites page using Insert > Forms.
- **Step 8:** Add a prominent 'Register Now' button/text linking to the form (if not embedded directly).
- **Step 9:** Preview the page on both desktop and mobile view to check design and readability.
- **Step 10:** Click 'Publish', set a web address (URL), and publish the site.
- **Step 11:** Share the published landing page link through social media, email and WhatsApp for registrations.

Alternative (Canva): In Canva, select 'Website' under the Create a Design option, choose a landing page template, edit the text with the workshop details above, add a form block or a button linking to a Google Form, and publish using Canva's free 'Publish' feature to get a shareable link.

Practical 3. Create a Facebook Business Page, Instagram Account, Threads Account, Business WhatsApp & Integrate it for Meta Campaign.

Step A: Create a Facebook Business Page

- Log in to a personal Facebook account.
- Go to Menu > Pages > Create New Page.
- Enter the Page name (business/brand name) and category.
- Add a profile picture (logo) and cover photo.
- Fill in business details — description, contact number, website, address, and business hours.
- Click 'Publish Page' to make the Page live.

[Fig: Facebook Business Page profile after creation — attach screenshot here]

Step B: Create an Instagram Account and Convert to Business Account

- Download the Instagram app and sign up using email/phone number.
- Set a username matching the brand name and add a profile photo/bio.
- Go to Settings > Account > Switch to Professional Account > Business.
- Select the relevant business category.
- Link the Instagram account to the Facebook Business Page created above.

[Fig: Instagram professional account settings screen — attach screenshot here]

Step C: Create a Threads Account

- Open the Threads app (by Instagram).
- Log in using the same Instagram account credentials.
- Import the profile (name, photo, bio, followers) from Instagram automatically.
- Complete profile setup and start posting brand-related updates.

Step D: Set Up WhatsApp Business

- Download the WhatsApp Business app from the Play Store/App Store.

- Register using the business phone number (different from personal WhatsApp, if possible).
- Set up the business profile — name, category, description, address, email and website.
- Add a catalogue of products/services (if applicable).
- Set up automated greeting messages and quick replies for customer queries.

[Fig: WhatsApp Business profile with catalogue — attach screenshot here]

Step E: Integrate All Accounts in Meta Business Suite for Campaigns

- **Step 1:** Go to business.facebook.com and create a Meta Business Manager account.
- **Step 2:** Add the Facebook Page to the Business Manager under Business Settings > Accounts > Pages.
- **Step 3:** Add/connect the Instagram professional account under Business Settings > Accounts > Instagram Accounts.
- **Step 4:** Connect the WhatsApp Business number under Business Settings > Accounts > WhatsApp Accounts.
- **Step 5:** Create/link an Ad Account under Business Settings > Accounts > Ad Accounts, and add a payment method.
- **Step 6:** Go to Meta Business Suite (business.facebook.com/latest/home) to manage Facebook and Instagram posting, messaging and insights from one dashboard.
- **Step 7:** Once all accounts are connected, they become available to select while creating any Meta Ad campaign (Facebook, Instagram, and WhatsApp click-to-chat ads).

Practical 4. Execute the Lead Generation Meta Campaign for AI Tools Workshop.

- **Step 1:** Log in to Meta Ads Manager (business.facebook.com/adsmanager).
- **Step 2:** Click 'Create' to start a new campaign.
- **Step 3:** Select the campaign objective as 'Leads'.
- **Step 4:** Name the campaign — e.g. 'AI Tools Workshop – Lead Generation'.
- **Step 5:** Choose the lead method as 'Instant Forms' (form opens within Facebook/Instagram itself).
- **Step 6:** Set the daily/total budget and campaign schedule (running before 21 Aug 2026).
- **Step 7:** Define the target audience — location, age group (e.g. college students, working professionals), interests (AI, technology, digital marketing), and language.
- **Step 8:** Select ad placements — Automatic Placements (Facebook, Instagram, Messenger) for wider reach.
- **Step 9:** Upload the ad creative — an attractive banner/video with text: 'Join the AI Tools Workshop – 21st Aug 2026 with Prof. Ravi Patel'.
- **Step 10:** Write ad copy highlighting workshop benefits and add a CTA button — 'Sign Up'.
- **Step 11:** Create the Instant Form with fields — Name, Email, Phone Number, and a custom question like 'Which AI tool are you most interested in?'.
- **Step 12:** Add a Thank You screen with workshop confirmation details and a link to add the event to calendar.
- **Step 13:** Review all campaign settings and click 'Publish' to submit for Meta's ad review.

- **Step 14:** Once approved, monitor the campaign in Ads Manager — track cost-per-lead, number of leads, and form completion rate.
- **Step 15:** Download/export collected leads regularly and follow up via email/WhatsApp for workshop confirmation.

Practical 5. Execute the Meta Traffic Campaign for Workshop Registration.

- **Step 1:** Log in to Meta Ads Manager and click 'Create' for a new campaign.
- **Step 2:** Select the campaign objective as 'Traffic'.
- **Step 3:** Name the campaign — e.g. 'AI Tools Workshop – Traffic Campaign'.
- **Step 4:** Choose the traffic destination as 'Website' and paste the landing page URL created in Practical 2.
- **Step 5:** Set the campaign budget and schedule to run until the workshop date (21 Aug 2026).
- **Step 6:** Define the target audience — students, working professionals, and people interested in AI/technology/digital skills.
- **Step 7:** Select placements (Automatic Placements recommended for maximum reach across Facebook and Instagram).
- **Step 8:** Upload creative assets — banner image/video announcing the workshop with date, topic and speaker name.
- **Step 9:** Write ad copy with a clear message and CTA button set to 'Learn More' or 'Sign Up'.
- **Step 10:** Install/verify the Meta Pixel on the landing page to track link clicks and page views.
- **Step 11:** Review the campaign details and click 'Publish' for Meta's review and approval.
- **Step 12:** Once live, monitor performance metrics — Link Clicks, CTR (Click Through Rate), and Cost per Click (CPC) in Ads Manager.
- **Step 13:** Optimise the campaign by pausing low-performing ad sets and increasing budget on high-performing audience segments.

Practical 6. Write steps to create different types of Meta Ads Forms for Lead Generation Campaign.

Meta Lead Ads offer different Instant Form types based on the volume and quality of leads required. The two main types are 'More Volume' and 'Higher Intent'.

Steps to Create a 'More Volume' Instant Form:

- In the Lead Generation campaign, go to the Ad level and click 'Create Form'.
- Select form type as 'More Volume'.
- Add an Intro screen (optional) with headline and workshop image.
- Add Questions — choose from prefill fields like Name, Email, Phone Number, or add custom questions.

- Add a Privacy Policy link (mandatory) for data collection consent.
- Design the Thank You screen with a confirmation message and a website/WhatsApp link.
- Save and finish the form — this type is quick to fill and generates a higher number of leads.

Steps to Create a 'Higher Intent' Instant Form:

- Select form type as 'Higher Intent' while creating the form.
- Add the same question fields (Name, Email, Phone, custom questions).
- This form type adds a review screen before final submission, where users must confirm/edit their details before submitting.
- This extra step filters out casual clickers and results in fewer but more genuine, higher-quality leads.
- Complete the Privacy Policy and Thank You screen, then save the form.

Steps to Create a Conversational Form (with Multiple Questions):

- Choose 'Create Form' and select the option to add multiple custom questions (e.g. 'Which AI tool are you interested in?', 'Are you a student or professional?').
- Use short-answer or multiple-choice question types to keep the form easy to fill.
- Arrange questions in a logical order — contact details first, followed by qualifying questions.
- Preview the form on mobile view, since most users fill lead forms on mobile devices.
- Publish the form and attach it to the ad set in the Lead Generation campaign.
